Innovative Insecticide Solutions

Insecticide Paper Protects against Zika, Chikungunya, Dengue & Malaria

100% fast kill against mosquitoes indoors. Very low cost, highly portable, made in UK.

Suitable for Public Health, Humanitarian Aid and Commercial Distribution.

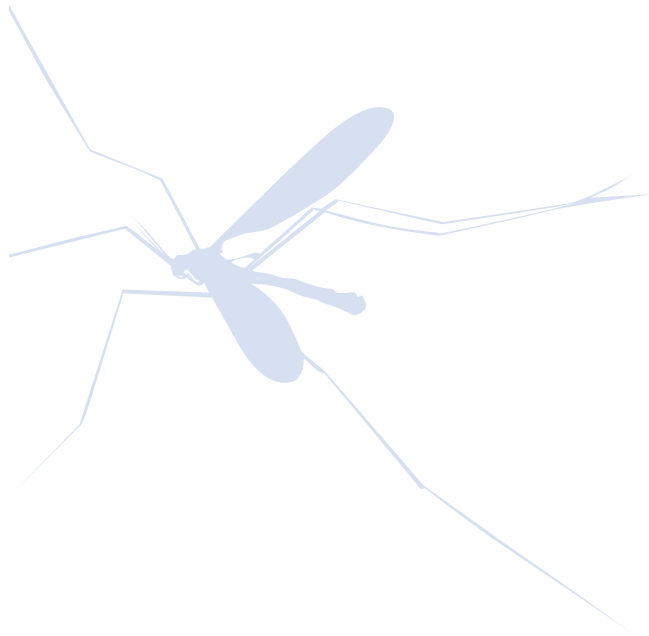

To prevent Zika and other diseases, an integrated approach to vector control is required.

- Outdoor spraying, destroying mosquito breeding sites and using personal repellent does not fully address the issue of indoor biting.
- Insecticide paper is the perfect product to kill mosquitoes indoors and may be used as part of integrated vector control campaign.
- Empowers the individual as can be taken and used anywhere indoors; home, office, schools, hotels, leisure facilities.
- Protects all in the room, not just those under a bed net or using repellent.
- Non harmful to pregnant women.
- Suitable for mass distribution to vulnerable people for very low cost.
- Supports community participation of mosquito control policies as very easy to use.
